

SUMMARY

Accomplished Full-Stack Developer and Senior Backend Engineer boasting over four years of experience creating and launching scalable web applications. Skilled in TypeScript, Express.js, Nest.js, and DevOps methodologies, with a track record of leading the development of trading platforms and streamlining CI/CD pipelines on AWS. Possesses strong problem-solving abilities, emphasizing performance optimization and operational effectiveness.

EXPERIENCE

Senior Backend Engineer

07/2024 - Present

ByDotPy ↗

- Leadership: Led a team of developers to design and deploy the Sabika Trading Platform (Mobile Application, WebSite) for Gold.
- Backend Development: Built scalable backend services using Express.js and TypeScript, ensuring high availability and optimal performance.
- AWS Deployment: Deployed backend services and frontend assets on AWS, utilizing Elastic Load Balancers, CloudFront, and RDS for a robust architecture.
- DevOps Implementation: Automated CI/CD pipelines with GitHub Actions and managed DNS and subdomains for production environments.
- Monitoring and Security: Configured centralized logging and monitoring systems for error tracking and operational insights.

Full-Stack Developer

08/2022 - Present

Freelance ↗

Design and Developed an ERP system to calculate invoices and integration with (Egyptian invoicing & e-receipt)

- <https://sdk.invoicing.eta.gov.eg/>
- Design and develop a frontend dashboard (Angular 16)
- develop and deploy server on aws
- (<https://envoice-1949f.web.app>)

Senior Full-Stack Developer

01/2024 - 04/2024

Qannas ↗

- Spearheaded the development and implementation of the Qannas system dashboard utilizing a robust full-stack approach with NestJS, AdonisJS, and Angular. Focused on creating a highly responsive and interactive user interface, ensuring seamless integration and functionality that enhanced operational efficiency and user experience.
- Led the backend development of the Qannas Community, a dynamic social networking platform modeled after Twitter. Architected and building scalable, high-performance API services using NestJS, which supported real-time data processing and interactions, significantly boosting user engagement and community growth.
- Collaborated closely with cross-functional teams to align the dashboard and community platform with business requirements, facilitating continuous feedback and iterative improvements that drove project success.
- Employed best practices in code quality, security, and scalability, contributing to a 30% increase in system performance and reliability through meticulous optimization and refactoring efforts.

Backend Developer

07/2023 - 06/2024

Shopx ↗

- Played a pivotal role in enhancing and refactoring the Lohanza e-commerce platform, successfully launched in 2023, using

- NestJS, PostgreSQL, and Prisma ORM, leading to a more robust and scalable architecture (<https://lohanza.com>).
- Spearheaded the development of a new professional version of Lohanza and launched an additional platform, SouqAlMoslimeen.com. Focused on building these platforms to support enhanced user experiences and expanded business capabilities (<https://souqalmuslimeen.com>).
- Orchestrated the deployment of both e-commerce platforms on AWS, ensuring high availability and optimal performance, significantly increasing market delivery's reliability and speed.
- Integrated multiple payment gateways, including Stripe and Paymob, into the platforms, facilitating secure and versatile payment options that enhanced customer satisfaction and operational efficiency.
- Developed a comprehensive API to support the Shopx platform, encompassing customer management, shipment lifecycle, and traveler services, which streamlined operations and improved service delivery to stakeholders.

backend developer

07/2022 - 06/2023

Shelter Investment Group ↗

- Planned, developed, and deployed several apps.
- Licensing Essentials System (Integration system)
- For inquiries and to pay the traffic violation bill.
- Plateforme -Microservice Nestjs -

to process and review traffic violations.

- Winch driving system -Nest js-
- (<https://www.amangroup-eg.com>)

Backend Developer

01/2022 - 06/2022

Smart Digital Service ↗

- Worked on an E-Payment system, which processes thousands of transactions every day with high.
- availability and low latency.
- Enhancing current services.
- Developing new apps helping E-Payment apps.
- Developing microservices to help e-payment app

EDUCATION

Computer Science

09/2015 - 01/2020

Helwan University - Bachelor of Computer Science

SKILLS

Docker, GitHub Actions, Nginx	Advanced	PostgreSQL,Mysql,MongoDb	Intermediate
JavaScript/TypeScript,Nodejs	Expert	TypeORM,Prisma	Expert
Express.js ,Adonis.js and Nest.js	Advanced	AWS (EC2, S3, RDS, CloudFront, Lambda)	Advanced
Redis	Advanced	Problem Solving	Expert
		Linux	Advanced

LANGUAGES

English	Intermediate	Arabic	Native
