SUMMARY

Senior Backend Engineer specializing in AWS serverless and Node.js platforms. Currently powering EVA energy systems across Belgium and France with 18 Lambda microservices, Terraform infrastructure, and AI-assisted operations. 5+ years shipping high-availability APIs, trading and SaaS products, and CI/CD pipelines that keep production reliable and fast.

EXPERIENCE

Senior Software Engineer

Software Techies 

04/2025 - Present

- Energy Platform:** Architect and run 18 AWS Lambda microservices controlling solar and home-energy systems for EVA (<https://www.evaportal.be/>) across Belgium and France.
- Automation:** Drive real-time device control and energy-flow optimization against dynamic tariffs to boost self-consumption and cut peak-price grid usage.
- Infrastructure:** Codify multi-environment AWS with Terraform, standardizing releases and reducing provisioning errors.
- AI Tooling:** Engineer an AI log-analysis chatbot that surfaces incident signals and speeds outage diagnosis.

Senior Backend Engineer

ByDotPy 

07/2024 - 04/2025

- Leadership:** Led engineers to design and launch the Sabika Gold Trading Platform (mobile and web).
- Backend Development:** Built high-availability Express.js and TypeScript APIs for trading workflows.
- AWS Deployment:** Deployed production on AWS with ELB, CloudFront, and RDS for reliable global delivery.
- DevOps:** Automated CI/CD with GitHub Actions and managed DNS, cutting manual release steps.
- Monitoring:** Implemented centralized logging and alerting for faster incident detection.

Full-Stack Developer

Freelance 

08/2022 - Present

- Launched Rodod, a unified customer-conversation SaaS for intake-to-reply workflows (<https://tryrodod.com/>).
- Delivered an ERP invoicing system integrated with Egyptian Tax Authority e-invoicing APIs (<https://sdk.invoicing.eta.gov.eg/>).
- Built an Angular 16 dashboard and AWS backend for live invoicing (<https://envoice-1949f.web.app>).

Senior Full-Stack Developer

Qannas 

01/2024 - 04/2024

- Spearheaded the Qannas operations dashboard (NestJS, AdonisJS, Angular) to streamline daily workflows.
- Architected NestJS APIs for Qannas Community, enabling real-time social interactions at scale.
- Accelerated system performance and reliability by ~30% through focused optimization and refactoring.

Backend Developer

Shopx 

07/2023 - 06/2024

- Refactored Lohanza (NestJS, PostgreSQL, Prisma) into a scalable production architecture (<https://lohanza.com>).
- Launched 2 storefronts, Lohanza Pro and SouqAlMoslimeen.com, expanding go-to-market reach (<https://souqalmuslimeen.com>).
- Orchestrated AWS deployments for both sites, improving release reliability under load.
- Integrated Stripe and Paymob to enable multi-provider checkout.
- Developed Shopx APIs for customers, shipments, and traveler services in one backend.

Backend Developer

Shelter Investment Group 

07/2022 - 06/2023

- Delivered 3 NestJS systems: traffic-violation licensing/payments, violations review, and winch operations (<https://www.amangroup-eg.com>).

Backend Developer

Smart Digital Service 

01/2022 - 06/2022

- Scaled e-payment microservices handling 1,000+ daily transactions with high availability and low latency.
- Extended core payment capabilities with new services without disrupting live throughput.

EDUCATION

Computer Science

09/2015 - 01/2020

Helwan University - Bachelor of Computer Science

SKILLS

TypeScript	Expert	Node.js	Expert
NestJS	Advanced	Express.js	Advanced
AWS Lambda	Advanced	Terraform	Advanced
DynamoDB	Advanced	PostgreSQL	Advanced
InfluxDB	Advanced	Drizzle	Advanced
Prisma	Expert	Redis	Advanced
Docker	Advanced	GitHub Actions	Advanced
Angular	Advanced	MongoDB	Intermediate
Serverless	Advanced	CI/CD	Advanced

LANGUAGES

English	Intermediate	Arabic	Native
